## Components & Accesories

**R140C**

- **R140C** : Membrane Safety valve for solar thermal

**R99S**

- **R99S**: Automatic air vent valve for thermal solar systems with shut-off ball valve included

**R20SC**

- **R20SC**: 3 piece straight fitting, male-male thread for connection to the manifolds

## Components & Accesories

**310**

- **310:** Straight fitting with metallic chamfered ring and copper connections

**311**

- **311 :** Straight fitting with metallic chamfered ring and copper connection and male threaded connection

**312**

- **312:** Straight fitting with metallic chamfered ring and copper connection and female threaded connection

**315**

- **315:** Elbow with metallic chamfered ring and copper connections

**318**

- **318:** T fitting with metallic chamfered ring and connection for copper pipe

**R189**

- **189:** Straight fitting for the connection of corrugated formed pipes made of stainless steel, flanged

**R564P**

- **R564P:** T fitting for the connection of corrugated formed pipes made of stainless steel, flanged

**R156**

- **R156:** Thermostatic mixing valve for distribution of sanitary hot water and integration with thermal solar system

**R93**

- **R93:** Male-female reduction bush

## The Circulation Group, : The “Heart” of the System

- Circulation group for 2 way solar system, with vent and safety group having temperature and capacity combined sensor for the connection to electronic regulator controlling differential temperature and thermal energy

**giac**  **sun**

## KTD — Regulator of the Giacosun Solar System

- The regulator of the Giacosun solar panel system, which can be integrated into the circulation group, allows the control of differential temperatures and the energy measuring captured by the collector and made available to the heater.

## Components & Accesories

**R586S-1**

- Circulation group for 2 way solar system, with vent and safety group having temperature and capacity combined sensor for the connection to electronic regulator controlling differential temperature and thermal energy

**R586S**

- Circulation group for two way solar system, with vent and safety group and mechanical flow meter

**KTD**

- Electronic regulator for the control of the differential temperatures in GiacoSun solar system

THANKS FOR THE ATTENTION
